

B: Remarks:

The applicants have corrected the claims 1, 11, and 21 as suggested by the Examiner, and also corrected claim 20. The undersigned review of the claims showed that some original claims have been noted as "Previously Amended" in the last amendment and the correct original notation has been used again for those claims not amended.

Reconsideration after this amendment is requested, and the examiner is respectfully traversed with respect to the rejections under 35 USC 103. The rejection assumes a teaching to one of ordinary skill of the art based on assumptions which are not factual, and therefore the rejection is considered without merit.

A declaration of an inventor, Brian Robert Prasky, together with the attachments to the declaration are appended setting forth reasons why the examiner's basic assumptions are wrong.

Reconsideration and allowance is now requested. It is respectfully submitted that the application should be in final condition for allowance which is respectfully requested.

RESPECTFULLY SUBMITTED

(For the inventors)
